Education

Louisiana Tech University Ruston, LA

Bachelor of Science in Computer Science, Minor in Mathematics *Aug. 2023 – Nov. 2026*

- **Relevant Coursework:** Artificial Intelligence, Software Engineering, Database Management Systems, Programming Languages, Intro. to Cybersecurity, Adv. Data Structures & Algorithms, Intro. to Graph Theory
- **Honors and Awards:** 3rd Place in LwC Freshman Exhibition 2024, Recipient of TC Energy STEM Scholarship

Experience

Resident Assistant June 2023 – Present

Louisiana Tech University *Ruston, LA*

- Developed and maintained residential communities across campus housing and apartment facilities
- Planned, organized, and executed department- and building-scale events with up to 100+ residents
- Enforced university policies among residents and staff; administered prospective student housing tours

Lead Sales Associate May 2023 - Aug. 2023

Dollar General *Epps, LA*

- Administered POS transactions with customers and distributors
- Managed the facilities in the absence of a superior
- Supervised and trained new employees, and ensured others were completing their work as tasked

Projects

Zono | *TypeScript, React Native, Expo, Supabase, Node.js* Spring 2026

∗ Collaborated in a team of 4 to build a cross-platform iOS/Android mobile app for a Software Engineering course
∗ Implemented live GPS tracking so users can view themselves and friends on a real-time map
∗ Integrated Supabase for backend services including authentication, database, and real-time data sync
∗ Supported in-app messaging and social interactions between users

Artificial Intelligence Assignments | *Java* Fall 2025

∗ Implemented a 3-layer neural network (4-3-2) from scratch using gradient descent and backpropagation, training across 6 epochs
∗ Extended the training engine to classify handwritten digits from the MNIST dataset with multiple user-selectable evaluation modes
∗ Built an object-oriented *Othello* game with a heuristic-driven AI using minimax search and alpha-beta pruning; exposed configurable search depth via command-line flags

UjGram | *Python, HTML, CSS, MySQL, Docker* Apr. 2026 – May 2026

∗ Full-stack social media web application developed for CSC4303 Database Management Systems
∗ Flask handles application logic and uses HTML templates for web rendering and CSS for styling, while the MySQL backend stores all user and website data
∗ Users can create accounts with different roles, create and publish posts, like, comment, and share other posts

Technical Skills

Languages: Java, Python, C/C++, TypeScript, JavaScript, SQL, PostgreSQL, HTML/CSS, Haskell, Rust
Frameworks & Libraries: React Native, Expo, Node.js, Flask
Databases: Supabase, PostgreSQL
Developer Tools: Git, GitHub, VS Code, Docker, NeoVim (Vim),
Concepts: Neural Networks, Machine Learning, Minimax/Alpha-Beta Pruning, OOP, IPC, REST APIs, Agile/Scrum
